SUMMARY

MCA student specializing in AI/ML engineering, NLP systems, and scalable backend application development. Experienced in building production-oriented AI applications using Python, FastAPI, PyTorch, Hugging Face Transformers, and Scikit-learn. Skilled in deploying end-to-end machine learning pipelines, REST APIs, and NLP-driven analytics systems with a strong focus on applied AI, model deployment, and scalable architecture.

TECHNICAL SKILLS

AI/ML & Data Science: Python, PyTorch, Scikit-learn, Hugging Face Transformers, NLP, Sentiment Analysis, Deep Learning, LLMs, NumPy, Pandas, Matplotlib

Backend & APIs: FastAPI, REST APIs, JWT Authentication, API Security, Scalable Systems Design

Frontend: React, Tailwind CSS

Databases: PostgreSQL, MongoDB

Cloud & DevOps: Docker, Git, GitHub, Model Deployment

Tools: Figma, Canva

PROJECTS

Customer Feedback File Analyzer | *Python, FastAPI, Pandas, Scikit-learn, NLP, React, Tailwind CSS*

github.com/Tejas-Acharya-C/CustomerFeedbackFileAnalyzer

- Architected and deployed an end-to-end NLP-powered analytics platform that automates sentiment analysis, keyword extraction, and feedback categorization from CSV/Excel uploads.
- Engineered FastAPI backend with REST APIs for high-throughput file ingestion and NLP processing pipelines, eliminating repetitive manual categorization workflows.
- Implemented modular NLP workflows using Scikit-learn for text classification and feature extraction across large-scale customer feedback datasets.

Obsidian Secure | *Python, FastAPI, React, Tailwind CSS, MongoDB, Docker, JWT Authentication*

github.com/Tejas-Acharya-C/Obsidian-Secure

- Designed and developed a secure full-stack application with JWT-based authentication, role-based access control, and protected REST API communication, mitigating unauthorized API access vectors.
- Built scalable backend architecture using FastAPI with modular service layers, enabling clean separation of concerns and horizontal scalability.
- Containerized the full application stack using Docker, achieving consistent deployment environments and eliminating environment-specific configuration failures.
- Integrated MongoDB for flexible document storage and engineered secure API endpoints with input validation and authentication middleware.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Oracle AI Vector Search Certified Professional
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Introduction to Data Analysis Using Python — Google / Coursera

EDUCATION

Master of Computer Applications (MCA)

Expected: 2027

RNS Institute of Technology, Bengaluru | Specialization: Computer Applications | CGPA: 9.0 / 10

ACHIEVEMENTS

- 2nd Prize — VISIONX Hackathon:** Competed and placed in a competitive technical hackathon, demonstrating applied AI/ML problem-solving under time constraints.
